

## Equality Impact Assessment (EqIA) Screening Template

### When to complete an EqIA Screening

An EqIA Screening Template must be completed when reviewing, changing and developing procedures/ proposals/ projects/ policies. This is a first step and is used to consider whether there are any negative impacts that may arise.

### Purpose of an EqIA Screening Template

The purpose of this short exercise is to ensure that you have shown appropriate due regard when considering the impact for people with protected characteristics in your decision making. The screening process is designed to help you consider the circumstances and to inform evidence-based decisions.

If the proposal is of a significant nature and it is apparent from the outset that a full EqIA will be required, then it is not necessary to complete this Screening Template, you can proceed to complete the full [EqIA](#).

If no negative impacts are identified following completion of the EqIA screening then it is not necessary to undertake a full EqIA however, the decision and justification must be clearly recorded in this document.

### On completion of the Screening Template:

- Ensure that all the white boxes within the screening are completed.
- Ensure that the Procedure/ Project/ Proposal/ Policy owner has signed and dated the Screening Template.
- Send a copy of the completed template along with the related policy or project proposal to [Inclusion.hdd@wales.nhs.uk](mailto:Inclusion.hdd@wales.nhs.uk) for the Diversity & Inclusion Team to review.
- Each Screening Template will be reviewed by the Diversity & Inclusion Team and feedback will be provided to the Procedure/ Project/ Proposal/ Policy owner. This may include recommendations for further action to inform robust decision-making.

<b>Director and Directorate</b>	Midwifery and Nursing
<b>Service Area</b>	Midwifery and Obstetrics

<b>Title of Procedure, Project, Proposal, Policy being screened:</b>	623 Large for Gestational Age in Non-Diabetic Guideline.
--	--

**Description of the Procedure/ Project/ Proposal/ Policy being screened (including key aims and objectives)**

The aim of this document is to:  
 Provide guidance to all staff to ensure consistent care planning and management for women and birthing people who have a fetus who is considered large for gestational age.  
 Objectives :  
 The aim of this document will be achieved by the following objectives:  
 Sets out the care planning and management for non-diabetic women and birthing people where the fetus has been identified as being large for gestational age on ultrasound scan.

**Evidence considered (including staff and population data, relevant research, expert and community knowledge etc.)**

The number of large babies is on the increase. Over the last decade there has been a 1525% increase in many countries in the number of women giving birth to large infants. This trend has been attributed to increases in maternal height, body mass, gestational weight gain, diabetes, reduced cigarette smoking and changes in socio-demographic factors.

The definition of a macrosomic fetus or large for gestational age (LGA) fetus is ambiguous and varies across the literature. NICE (2021) state that fetal macrosomia describes a baby that is believed to be large for its gestational age, with an estimated fetal weight above the 95th percentile, at or after 36 weeks of pregnancy. Various ways have been used to define macrosomia over the years, including >4kg, >4.5 kg, or > 90th or 95th population based centile.

**To promote consistency in Hywel Dda University Health Board LGA will refer to a baby over the 97<sup>th</sup> Centile on the USS in line with the All-Wales Maternity and Neonatal Guideline “All Wales Midwifery led Care Guideline”**

**Assess which protected characteristics will potentially be affected by the proposal in the table below** (please ✓ the relevant box to confirm positive, negative or no impact).

**If at any point a negative impact has been identified (actual or potential), you do not need to proceed with the completion of this form, as a full EqlA must be undertaken:** [Equality Impact Assessments \(EqlAs\) \(sharepoint.com\)](http://sharepoint.com)

<b>Age</b>				
Is it likely to affect older and younger people in different ways or affect one age group and not another?				
Positive Impact	<input type="checkbox"/>	Negative Impact	<input type="checkbox"/>	No Impact
				x
