

## Appendix 1 – Screening for selective growth restrictions in twins

### **Fetal growth discordancy in EFW**

To be calculated at each visit from 20 weeks onwards and if this exceeds 20% prompt referral should be made to the Fetal Medicine Unit, UHW.

Fetal Growth Discordancy %

Large twin EFW – Small twin EFW X 100 = .....%

Large twin EFW

Liquor volume should be assessed as deepest pool (each Twin) and not AFI in Multiple pregnancies.
