

Molar Pregnancy Clinical Pathway

Suspected Molar Pregnancy

- Patient Information Leaflet
- Book ERPC
- Inform EPAU of patient details

Surgical Management

- ERPC (avoid syntocinon if possible.)
- Send Histology as USC. Results to PF/CK
- Secondary deposits must not be biopsied (significant haemorrhage risk)

Molar Pregnancy Confirmed (Histology)

- EPAU to Inform Patient and PF/CK send referral to Charing Cross (On Call Consultant in their absence.)
- Provide written information if not already given.

Follow-up through EPAU

- Blood samples for hCG taken in EPAU (only using kit sent by CHX to patient)
- Patient to contact EPAU with any symptoms./concerns

Charing Cross Follow Up

Persistent high hCG/bleeding/queries - discuss with CHX **before** repeat ERPC/biopsy.
CHX will contact local clinician if needs further ERPC or chemotherapy
Chemotherapy regimen from CHX needs to be prescribed on local drug chart.
